

CMCP205 Motor Fin Mounts

Features:

- Available in Four Sizes
- 416 SS (Magnetic)
- Kits Supplied with Adhesive, Dispenser, Mixing Nozzles
- Obtain Meaningful Vibration Data

Description:

The CMCP205 Motor Fin Mounts provide a mounting location for either magnetically mounted or permanently mounted accelerometers on motors where the bearing housing is not accessible. The Fin Mounts are machined from 416 SS and are adhesive mounted between the cooling fins of the motor. The CMCP205 Fin Mounts are provided in four sizes to accommodate a variety of motors and to keep the amount of required adhesive to a minimum. The CMCP205 can be purchased individually, and are available in kits in quantities of 50 or 100. Kits are supplied with adhesive and mixing nozzles.

Specifications:

Material: 416 SS (Magnetic)
 Pad Thickness: 3/8"
 Pad Surface Finish: 32 μ in. RMS
 Pad Tap: 1/4-28
